

# Closed loop digital pressure control

## relief or reducing valves

### ① RZMO-REB-P-NP s. 10 - basic *table GS205*

Replace actual digital ZO-TERS valves in PS execution, without fieldbus interface

#### Improvements vs ZO-TERS:

ingress protection IP66/67  
rugged construction for vibration & shocks  
ambient temperature range  $-40^{\circ}\text{C} \div +60^{\circ}\text{C}$   
white zinc protection coating on driver case  
tropical coating on electronic PCB

**Valve performance:** slightly improved vs ZO-TERS

**Reference & monitor signal:**  $0 \div 10\text{ V}$  or  $4 \div 20\text{ mA}$

**Valve setting:** by Atos software through USB port

**Fieldbus interface -NP** = not present

**Prices: competitive** respect ZO-TERS:

RZMO-REB-P-NP-010 reduction -23%

**Options:** **I** current reference & monitor  $4 \div 20\text{ mA}$

**Q** enable signal

**Z** adds double power supply, enable and fault signals

### ② RZMO-RES-P-\* s. 10 - full *table GS205*

Replace actual digital ZO-TERS valves with fieldbus communication interface

**Improvements vs ZO-TERS:** see ZO-REB

**Valve performance:** slightly improved vs ZO-TERS

**Reference & monitor signal:**  $0 \div 10\text{ V}$  or  $4 \div 20\text{ mA}$

**Valve setting:** by Atos software through USB port

#### Fieldbus interface \*\*

for digital reference, valve's diagnostics & setting:

**-BC** = CANopen

**-BP** = PROFIBUS DP

**-EH** = EtherCAT (not available for ZO-TERS)

**Prices: competitive** respect ZO-TERS:

RZMO-RES-P-BC-010 reduction -21%

RZMO-RES-P-BP-010 reduction -24%

**Options:** same as ZO-REB

**New REB/RES** closed loop pressure control proportionals, relief or reducing, are equipped with new on board digital driver and integral pressure transducer, to ensure top market performances

#### Standard 7 pin connector:

power supply, analog reference & monitor  $0 \div 10\text{ V}$  or  $4 \div 20\text{ mA}$

#### Optional 12 pin connector:

add double supply, enable & fault

USB port for software setting

Integral pressure transducer

### REB/RES dynamic response

The valve is provided with 4 PIDs configurations to match different hydraulic conditions. The required PID configuration can be selected through Atos E-SW software via USB port. Only for RES the PID can be also selected in real time, through PLC via fieldbus.

**PID: 1 fast** - default, interchangeable with TERS

**2 standard**

**3 smooth**

**4 open loop**

#### Standard 7 pin connector:

power supply, analog reference & monitor  $0 \div 10\text{ V}$  or  $4 \div 20\text{ mA}$

#### Optional 12 pin connector:

add double supply, enable & fault

Fieldbus interface port **-BC** or **-BP**

USB port for software setting

Integral pressure transducer

EtherCAT interface ports **-EH**

USB port for software setting

Integral pressure transducer

**-EH** 24 mm higher respect -BC or -BP

# Range overview

**DRAFT**

**RZMO-REB-P-NP-010**  
Relief, direct

**AGMZO-RES-P-BP-20**  
Relief, two stage

**RZGO-RES-P-EH-010**  
Reducing, two stage

**AGRCZO-REB-P-NP-20**  
Reducing, two stage

**LIMZO-RES-P-NP-2**  
Relief, cartridge

**RZGO-REB-P-NP-010**  
Reducing, direct

**AGRCZO-RES-P-BC-10**  
Reducing, two stage

**LICZO-RES-P-BC-4**  
Relief, cartridge

**AGMZO-REB-P-NP-10**  
Relief, two stage

**RZMO-RES-P-EH-010**  
Relief, direct

**New E-BM-RES closed loop digital drivers in DIN rail format** are strictly derived from on board RES ones, for remote cabinet installation in applications with critical temperatures or environments. They are designed to supply & control high performances ZO-R closed loop pressure control valves with integral pressure transducer

## ③ E-BM-RES -\*\* series 10 - DIN rail panel format table GS203

**Reference & monitor signals:** 0÷10 V or 4÷20 mA

**Pressure feedback signal:** 0÷10 V or 4÷20 mA

**Valve setting:** by software through USB port

### Fieldbus interface \*\*

for digital reference, valve's diagnostics & setting:

-NP = not present

-BC = CANopen

-BP = PROFIBUS DP

-EH = EtherCAT

**Prices:** 2016 price lists

**Options:** I current reference & monitor 4÷20 mA

C current feedback 4÷20 mA for pressure transducer

A max current limitation for ex proof valves

USB interface port -NP

CANopen interface port -BC

PROFIBUS DP interface port -BP

EtherCAT interface ports -EH

DIN-rail panel format
